Paris, France | +33 7 45 53 27 39 | assimben2004@gmail.com

24-month Work-Study (Alternance) – Data & Digitalisation, Procurement / Supply Chain – Available immediately

Schedule 3 weeks in company / 1 week at school – M1 & M2

LinkedIn: linkedin.com/in/assim-ben-ahmed-6268741a8 | GitHub: github.com/assim-ben-ahmed | Portfolio: assim-ben-ahmed.github.io/portfolio

PROFILE

4th-year (Bac+4) student in aivancity's Grande École Programme in AI & Data Science, ranked 2nd in my cohort in 3rd year, with hands-on experience deploying automations to production that structure data and eliminate manual tasks. Rigorous about data quality, comfortable gathering requirements from multiple stakeholders and benchmarking market solutions. Eager to contribute to supply continuity by improving supplier data reliability, building risk KPIs and digitalising Procurement-Supply Chain workflows.

DATA & AI PROJECTS

Data Quality Audit – SQL Case Study

- Audit of a transactional database in SQL to identify anomalies, inconsistencies and missing data undermining reporting reliability
- Classification of high-risk cases and writing of corrective queries, an approach directly transferable to controlling a supplier master data repository

Build with AI – Google Hackathon

3rd place / Top 8

- Design and delivery in 8 hours of an operational portal (Python, Node.js, Mistral AI) with booking and automated email confirmations
- Working solution by the end of the day, selected by public vote, demonstrating the ability to deliver a useful digital tool quickly

PROFESSIONAL EXPERIENCE

Data & AI Intern – WELL PACK (Paris)

April 2025 – July 2025

- Diagnosis of a manually run process for sending sales SMS and following up leads, with incomplete and unreliable CRM data
- Scoping, in a team of 4, of send automation and lead data cleansing, aligned with the sales team's needs
- Development of a data pipeline and a predictive model (Python, pandas), integration with Pipedrive CRM via REST APIs, n8n workflows, Docker and Git
- Production deployment with a user interface and user documentation, CRM updated automatically and sales reps' manual tasks reduced

Data & BI Intern – La Galite Voyage (Tunisia)

- Diagnosis of a business run without consolidated indicators, with customer and booking data scattered across several sources
- Requirements gathering with management and operational teams to prioritise reporting, customer segmentation and customer service automation
- Design of an operational BI dashboard and a customer segmentation model (Python, Power BI), development of a RAG assistant on WhatsApp and the web
- Implementation of shared performance indicators and a segmented customer base, used for activity monitoring and sales targeting

Consultant – Clinique de l'IA, aivancity – Shift Technology Engagement

2024 – 2025

- Support for the client in selecting a CRM tool suited to its processes, in a broad and hard-to-read market
- Gathering and formalisation of requirements, identification of candidate solutions and definition of a selection criteria grid
- Benchmark of solutions through automated data collection (Python scraping) and comparative analysis of features, strengths and limitations
- Structured, data-driven recommendation delivered to the client to guide and secure its decision

EDUCATION

aivancity – Grande École Programme, Master's level, AI & Data Science

2023 – 2028

- 3rd year completed – ranked 2nd in cohort
- M1 modules in Supply Chain Management & Smart Operations, Advanced Data Analysis & Visualization, Data Governance

Learning Trip – Morocco (Orange Digital Center, UM6P StarGate, 1337)

May 2026

International Baccalaureate – Mathematics

2022 – 2023

SKILLS

- **Data & BI –** SQL, Excel, Power BI (KPIs, dashboards), pandas, ETL pipelines, data quality
- **Automation –** Python (advanced), validation rules, API integration (REST, Pipedrive), Docker, Git
- **Analysis & Consulting –** Requirements gathering, solution benchmarking, recommendations, time-series forecasting
- **AI –** Machine Learning, NLP/LLMs, AI agents, scikit-learn, PyTorch, Hugging Face
