BUSINESS MODEL CANVAS

PROBLEM

- Lack of Early Insight: Limited tools for early detection of newborn health risks.
- Data Complexity: Difficulty analyzing genetic and familial health data.
- High Treatment Costs: Late-stage treatments are costly and less effective.

EXSITING ALTERNATIVES

- Genetic Counseling: Limited accessibility and high cost.
- Screening Programs: Often narrow in scope, not comprehensive.
- Reactive Care Model: Focuses on treatment post-diagnosis.

SOLUTION

- AI-Driven Predictions: Analyzes parental health data to predict newborn risks.*
- User-Friendly Interface: Easy access to insights via mobile/web app.
- Secure and Scalable: Azure-based platform ensures data security and growth potential.

KEY METRICS

- Adoption Rate: Growth in partnerships and users.
- Prediction Accuracy: Reliability of health risk predictions.
- Retention and Feedback: Continued engagement and user satisfaction.

UNIQUE VALUE PROPOSITION

Proactive, AI-Driven Health Predictions for Newborns: Vitalight empowers families and healthcare providers with early insights to prevent diseases before they develop, reducing healthcare costs and promoting lifelong health.

HIGH LEVEL CONCEPT

VitaLight = Preventive Health Insights for Newborns, Powered by AI

UNFAIR ADVANTAGE

- Proprietary AI Model: Specialized predictions for newborn health.
- Personal Commitment: Inspired by personal experience, driving dedication.
- Strategic Partnerships: Planned collaborations with healthcare providers.

CHANNELS

- Healthcare Partnerships: Hospitals, clinics, insurance providers.
- Digital Marketing: Targeted ads for parents and providers.
- Insurance Partnerships: Offer VitaLight as a value-added service.

CUSTOMER SEGMENTS

- Primary: Hospitals, clinics, insurance companies.
- Secondary: Health-conscious parents.

EARLY ADOPTERS

- Healthcare Institutions: Hospitals, clinics with a focus on preventive care.
- Tech-Savvy Parents: Proactive about health, open to technology.

COST STRUCTURE

- Fixed Costs: Projected to include Azure cloud services, regulatory compliance, and AI model development.
- Variable Costs: Expected marketing, customer acquisition, support services, and training costs for healthcare providers.

REVENUE STREAMS

- B2B Subscriptions: Anticipated subscription fees from healthcare providers and institutions.
- B2C Model: Potential one-time or subscription fees for direct access to the app for individual parents.
- Insurance Partnerships: Potential revenue from partnerships with insurance companies offering VitaLight as a preventive health tool.
